

UniCoat 3

UniCoat 3 is used for the treatment and coating of everything from vegetable seeds through row crop seeds. UniCoat 3 is available in several different colors based on customer preference.

- Used in both seed treating and coating
- Offered in a variety of colors as well as a non-colored neutral formulation
- Dilution rate up to 3:1 with water
- Compatible with most seed treatment solutions
- Quick drying
- Water soluble for easy cleanup
- Advanced binding capabilities
- Improved seed flow through equipment
- Compatible with many different coating materials (e.g. talc, clay, gypsum)
- Microplastic free

Dilution

UniCoat 3 can be diluted based on the customers preference and application needs.

Applications Testing Lab

Universal Coating Systems has an applications testing lab at our Independence, Oregon facility where we can do applications testing in our rotary treatment systems to evaluate any products or materials a customer may want to test.
