

UniCoat 4800 CCS

The UniCoat 4800 CCS is our largest production treating and coating solution. It is a very versatile, high-output seed treating and coating platform. It offers a small footprint, high output, and easy access for cleaning. The UniCoat 4800 CCS is a versatile treating and coating solution for larger production-based vegetable and agronomic seed crop applications.

- Treating rate of 500-1,000 lbs of seed per minute
- 1:1 coating batches of 150-200 lbs of seed per minute
- 48" treating and coating chamber with spun steel machined rotor
- Rotor driven by 25 HP belt drive platform, soft-start module
- Atomizer driven by 1/8 HP motor
- Top cover contains two large access doors for ease of cleaning
- Units are configured with two Masterflex L/S and I/P peristaltic pumps
- Control System:
 - PLC logic control
 - Human Machine Interface (HMI)
- Optional add-ins:
 - Variable speed drive
 - Up to four powder feeders
 - WIPS "Weigh in place" loss in weight system for both liquid and powder application
